Portable usp power supply

Overview

What is pocketpd power supply?

PocketPD is a USB Type-C powered bench power supply that fits inside your pocket. Paired with a modern USB Type-C charger or power bank, it is a full-featured power supply that can provide a wide range of voltage with built-in safety. It is equipped with an OLED display, current sensor, and banana jack output for all your standard equipment.

How powerful is a portable power supply?

This portable power supply is also pretty powerful for its size and price range. If all you are looking for is a way to charge up your cell phone, then this would be a great option. For instance, if you have an iPhone, you would be able to charge it about 15 times before you ran out the power supply of the power pack.

How do you charge a portable power supply?

You can choose to charge it with a wall plug, DC outlet in your car, or, if you are feeling adventurous, with solar panels. This makes it a truly versatile device that is designed to be used both in the home and on the go. If you are in the market for a great portable power supply, we highly recommend that you give this one a try!.

How much power do you need for a portable laptop?

You would also be able to run larger devices, such as lights or fans if the output were high enough. For instance, if you want to charge a laptop, you would need a power supply that could run about 60-90 watts, which even a smaller power supply like the EWEMOSI AC Outlet Portable Laptop Power Bank could handle with no problem.
