Portugal Porto monocrystalline solar module panels

Overview

What is a monocrystalline solar panel?

A monocrystalline solar panel is a solar panel comprising monocrystalline solar cells. These cells are made from a cylindrical silicon ingot grown from a single crystal of silicon of high purity in the same way as a semiconductor. The cylindrical ingot is sliced into wafers forming cells.

Should you install solar power in Portugal?

You may want to relocate as an expat, renovate your home as an investor, or be a pensioner looking for efficiency; solar installation in Portugal is an inexpensive option. Aside from cutting your electricity bills, solar power can make you an independent individual and the proud possessor of an asset-rich property.

Why do solar panels shut off in Portugal?

The majority of solar panel systems in Portugal automatically shut off in the event of a power outage for safety. This happens so electricity is not fed back into the grid, potentially harming technicians working on the lines. However, there are solutions such as SmartGuard by Huawei, to keep your system running during the power outage.

What is the VAT rate for solar panels in Portugal?

Until 30 June 2025, installations benefit from a reduced VAT rate of 6% on mainland Portugal (5% in Madeira, 4% in the Azores). After that, the rate is expected to return to the standard 23%. Thinking about installing solar panels in your Portuguese home?
