## Overview

---

What is the global power inverter market size?

Looking to go beyond insights?

Explore our premium consulting services designed to help you gain a competitive edge. The global power inverter market size was valued at USD 46.57 billion in 2023 and is projected to grow from USD 53.49 billion in 2024 to USD 209.74 billion by 2032, exhibiting a CAGR of 18.62% during the forecast period.

What is the market share of power inverters in North America?

North America, which currently has a market share of 35.3%, is expected to be one of the largest markets for power inverters during the forecast period. The rapid growth of several industries, like IT, IoT, Healthcare, etc., in the region is expected to surge the adoption of power inverters in North America.

Why is the power inverter market growing?

The heavy usage of UPS is responsible for the constant growth of the power inverter market. Major players are launching new products in the market. For instance, in February 2024, Schneider Electric, a global leader in energy management and automation, launched the Easy UPS 3-Phase 3M Advanced in Mumbai, India.

What is the market share of power inverters in Europe?

Europe, which currently has a market share of 24.1%, is expected to be one of the most significant markets for power inverters during the forecast period. Apart from the growth of various industries, people in this region are generally looking for ways to reduce noise pollution.
