Price of a 60kWh Solar Container

Overview

How much does a 60kW Solar System cost?

The cost of 60kW solar power systems varies. On the lower end, you might expect to get Chinese inverters such as Sungrow, Growatt, JFY, Goodwe etc. and Chinese (lower-tier) panels such as Hannover, Munsterland, ZN Shine etc. You might expect to pay \$69,000.00 for such a system.

How big is a 60kW solar power system?

A 60kW system using 370W panels will require about 284.2 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 60kW solar power systems are mostly suitable for Larger businesses with high energy needs. This size of solar power system is classed as "Commercial/Industrial".

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
