# Price of courtyard solar panels

**TAX FREE**

### Product Model

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

### Dimensions

1600\*1280\*2200mm  
1600\*1200\*2000mm

### Rated Battery Capacity

215KWH/115KWH

### Battery Cooling Method

Air Cooled/Liquid Cooled

## Overview

---

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How much does a solar panel installation cost?

Installation charges typically range from 20% to 30% of the total system price. Professional installers follow local restrictions and optimize panel placement for best efficiency. The small size of the excellent solar panel system makes installation easier, lowering labor time and associated expenses.

How much does a solar battery cost?

A single solar battery typically costs, on average, \$5,097, depending on capacity, type, and brand.\* For whole-house backup systems with more than 25 kWh capacity, costs can exceed \$25,000, not including installation. The price varies significantly based on storage capacity and brand.

How much does a solar system cost in 2025?

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.
