Price of solar modules produced in the UK

Overview

How much do solar panels cost in the UK?

Solar panels are more affordable than ever, but prices still vary depending on your system size, roof type, and energy goals. Here's what you need to know In October 2025, the average cost of solar panels for a typical three-bedroom UK home ranged from £5,000 to £9,000, depending on system size, equipment quality and whether you include a battery.

How much does a solar panel cost?

The cost of a solar panel system depends on several factors: System size: Measured in kilowatt-peak (kWp), larger systems cost more but generate more power. Panel type: Premium monocrystalline panels (£1,000–£1,500/kW) are pricier than polycrystalline (£900/kW) or thin-film (£400–£800/kW).

What are the cheapest solar panels in the UK?

The cheapest solar panels in the UK are typically polycrystalline models, which cost around £4,000–£5,000 for a small 3kW system. While they're less efficient than monocrystalline panels, they still offer a reliable and affordable way to cut energy bills.

Are solar panels cheaper in the UK 2025?

UK 2025 prices guide Solar panels are more affordable than ever, but prices still vary depending on your system size, roof type, and energy goals. Here's what you need to know
