

NKOSITHANDILEB SOLAR

Ratio of energy storage equipment in Chad

LiFePO₄

Wide temp: -20°C to 55°C

Easy to expand

Floor mount&wall mount

Intelligent BMS

Cycle Life:≥6000

Warranty :10 years

Overview

What energy resources does Chad have?

The majority of its existing capacity comes from diesel, natural gas and heavy fuel oil generation. Chad is living an energy crisis that undermines its development possibilities with extremely limited electricity access (8%). The country is however rich of energy resources, including fossil fuels with strongest solar and wind energy potential.

How much electricity does Chad have?

In Chad, only 4% of the population has access to electricity. This goes hand-in-hand with low rates of access to basic services such as drinking water, basic sanitation and paved roads. Meanwhile, crude oil has become the country's primary source of export.

Where can I find information about energy access in Chad?

Find relevant information for Chad on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage. (Sustainable Development Goal indicators 7.1 energy access, 7.2 on renewable energy and 7.3 on energy efficiency).

Does Chad framework allow private investment in energy production?

Chad framework has allowed private investment in energy production since only in recent years and as of 2018 Currently only one solar IPP (Djermaya - 28MW) is active and expected to reduce power supply failures and global price fluctuation. This project is also part of the Desert To Power Initiative.
