

Seamless solar roof glass house

Overview

What is an Infinity Solar Roof?

The Infinity solar roof is an almost seamless glass roof with exceptional power generation capacity. Solar panels are mounted within a structural framing system and the roof is then finished with high quality welded aluminium flashings that are powder coated for colour matching.

What are solar slates & solar roofs made of?

Our solar slates and solar roof products are manufactured using toughened glass, marine-grade aluminium & stainless steel, and are independently tested & certified. Our products are more extensively proven than those of any of our competitors, globally.

What is a good example of a seamless glass wall?

A good example of its application can be seen at the UNIT.City Office in Kyiv, Ukraine. The architects included a seamless glass wall on the front and rear of the building, complemented by snipped glass lines on the sides, without compromising the lightness of the facade.

Are GB-Sol solar panels fire rated?

Global solar and construction accreditation bodies are used to test and certify our solar panels and mounting systems. In independent fire tests, GB-Sol's Infinity and Integrated solar roofs achieved EXT.S.AA, the highest possible rating under BS 476-3: 2004 - Roof Fire Test. Testing also confirmed passes for the CEN/TS1187:2012 Test4.
