Serbia Solar Fan

Overview

What is a solar fan?

The term “solar fan” actually covers a wide range of devices with different purposes. A solar fan can be an attic fan, roof fan, stand-up fan, car window fan, personal fan, indoor ceiling fan, chicken coop fan, or portable fan. There are even some solar fans built into hats for construction work, such as the Miceux Hard Hat.

What is a solar powered attic fan?

A solar powered attic fan, also known as an exhaust or ventilation fan, is used to regulate the heat of a room. It works by exhausting hot air from the room and making it cooler. Additionally, it helps in eliminating odor and fumes. Below are some of the best solar powered attic fans that you can use at your home or office.

What makes a good solar fan?

Some solar fans include a USB port for handy mobile device charging. The solar panels and the fan itself should be of high build quality. This can be particularly important if you’re installing the fan in an attic or roof. The following fan characteristics often reflect good build quality.

How much does a solar roof fan weigh?

If you want a roof fan, you will likely prefer something that’s not so heavy it requires added reinforcement to support the weight. In general, solar fans range from under 1 pound to 30 pounds or more. The more powerful a solar fan is, the more air it can move around.
