Seychelles solar Panel Subsidy

Overview

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

Who will be subsidized for solar PV systems in Seychelles?

Domestic and commercial entities alike, will be subsidized varying amounts (depending on sector and system size) when purchasing and installing solar PV systems. The Global Environmental Facility and the Government of Seychelles, have created a fund of \$1.4 million to be used under this component of the project.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What is the financial rebate scheme in Seychelles?

The Financial Rebate Scheme will allow for anybody in Seychelles to have a 35 percent financial rebate on any PV system up to 3 kilowatt peak (kWp). Domestic and commercial entities alike, will be subsidized varying amounts (depending on sector and system size) when purchasing and installing solar PV systems.
