

Size of Kuwait s offshore energy storage facility

Overview

Where are Kuwait's key oil projects located?

Key projects, located in northern Kuwait, include associated light oil from the Jurassic natural gas field projects coming online by 2024 and heavy oil additions at the Lower Fars phase 2 project slated to be online before 2040.

How much energy does Kuwait use in 2021?

Kuwait's economy consumed an estimated 1.6 quadrillion British thermal units (quads) of primary energy in 2021, up from 1.5 quads in 2020, after the country began to recover from the effects of the COVID-19 pandemic (Table 1).

How much oil does Kuwait use?

Kuwait's oil consumption reached 365,000 b/d in 2022, up from nearly 290,000 in 2020 (Figure 4).²⁴ Kuwait uses a significant amount of fuel oil in its electric power sector, although the higher supply of natural gas over the past decade has replaced some of the fuel oil and direct crude oil burn for electricity generation.²⁵

How will Kuwait increase its natural gas production in 2024?

Kuwait intends to increase its natural gas production through the development of natural gas fields not associated with crude oil production.³⁴ As part of this goal, Kuwait is expanding the Jurassic natural gas field production in the northern region by 110 Bcf in 2024 (Table 2).
