

Slovakia energy storage power supply price

Overview

How much does electricity cost in Slovakia?

The electricity price for businesses is EUR 0.253 kWh or USD 0.291. These retail prices were collected in September 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Slovakia with 150 other countries. Historical quarterly data, along with the latest update from March 2025 are available for download.

What is the main source of electricity in Slovakia?

Nuclear power plants are the main source of electricity production in Slovakia. In 2022, over 59 percent of total electricity generation in the country was derived from this source. By comparison, hydroelectric power plants accounted for 13.7 percent of power production, the most of any renewable source.

How much energy does Slovakia use?

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia.

Why does Slovakia use nuclear power?

Nuclear power plays a pivotal role, contributing significantly to the country's electricity generation. This reliance on nuclear energy aligns Slovakia with some of the most advanced energy strategies in Europe. The country also utilizes conventional sources such as coal and natural gas, though in lesser proportions compared to nuclear power.
