

# Slovakia invests in solar glass enterprises

## Overview

---

How much solar power does Slovakia have?

Slovakia has around 472 MW of installed solar PV power generation capacity in 2019. Solar PV is expected to claim 44% of the clean energy capacity needed to generate 2.4 TWh of electricity by 2021. In particular, solar energy provides an important contribution to meet energy needs in the electricity sector.

What is solar photovoltaics in Slovakia?

Slovakia solar photovoltaics is mainly driven by the residential sector. Slovakia has around 472 MW of installed solar PV power generation capacity in 2019. Solar PV is expected to claim 44% of the clean energy capacity needed to generate 2.4 TWh of electricity by 2021.

What is Slovakia's energy policy?

In a 2018 review of the Slovakia's energy policy, the International energy agency (IEA) stated that Slovakia has plans to meet its national renewables target mostly with unsustainable biomass, placing pressure on the stability of the country's ecosystems.
