Solar DC water pump in Sydney Australia

Overview

What are Commodore Australia solar pumps?

Commodore Australia 's solar pumps are designed and manufactured for efficient water management in the Agriculture industry and on off-grid properties. Submersible Solar Bore Pumps, Surface-Mounted Solar Pumps, and Workhorse Hybrid Solar Pumps ensure efficient water management for irrigation, livestock watering, or storage needs.

Who are solar water pumps?

At Solar Water Pumps, we specialise in offering a diverse range of products tailored to meet your unique requirements. Whether you need a pumping solution for your farm, livestock or irrigation needs, our goal is to help you find the right solution that caters to your specific needs.

What is a DC1 & DC2 solar pump kit?

The DC1 and DC2 solar pump kits are designed for simple installation. They are a reliable and sensible solution for windmill replacement. Designed and built in Australia for Australian harsh conditions. Suitable for Stations and farms where a reliable water supply is required. Supplied in a kit - with no on-site wiring, just plug and play.

Who is a solar pump system supplier?

Solar Pump System Supplier - Think Water designs, supplies, installs and maintains solar pump systems utilising state of the art technology.
