

## NKOSITHANDILEB SOLAR

# Solar Light 1p 69W

## Overview

---

What is a two in one solar street light system?

Two in one means that the whole system includes two main parts: a street lamp head (integrates LED modules, solar controllers and batteries), and an independent solar panel. Weather dependence: Solar street lights rely on solar panels to absorb sunlight for charging.

What is integrated solar street light?

Please contact us for further details. Integrated solar street light means that the whole solar street light system is integrated into an LED street light, that is, there is a solar panel on the street light, and the street light contains batteries, controllers, microwaves, etc.

What is a reliable solar power street light supplier?

As a reliable solar power street light supplier, we have materials stocks for solar street lamp, regular delivery time is 3 days for samples and 2 weeks for bulk. We use top stable quality solar panels and lithium battery and MPPT controller for all solar led street light. Providing 3 Years warranty at the cheapest price.

What battery does a solar street light use?

Integrated solar street light usually use lithium battery as energy storage. Lithium battery are divided into ternary lithium batteries and lithium iron phosphate batteries (LiFePo4 batteries), Lithium battery is a key component in solar street lights, and the cost is also the highest.
