What does a solar inverter icon mean?

- Sun Icon: Typically indicates that the solar panels are receiving sunlight and the system is generating power.
- Grid Icon: Shows if the inverter is connected to the utility grid. It may blink or change color if there's an issue with the grid connection.

How do solar inverters work?

Understanding the data displayed by your solar inverter is crucial for monitoring the performance and health of your solar power system. Solar inverters not only convert DC power generated by your solar panels into AC power usable in your home but also provide valuable insights through their digital displays or connected monitoring systems.

What does a solar system indicator mean?

- System Status: Indicators or symbols here can show whether the system is operating normally, in standby mode, or if there is an error or fault.
- Sun Icon: Typically indicates that the solar panels are receiving sunlight and the system is generating power.

Why is my inverter displaying an error message or code?

If your inverter displays an error message or code, refer to your user manual for a detailed explanation and recommended actions. Common issues might include:

- Grid Disturbance: Issues with utility power affecting inverter operation.
- High/Low Voltage: The input voltage from the panels is outside the normal operating range.
