# Solar module export returns

## Overview

---

How many solar modules did China Export in 2024?

(Photo Credit: TaiyangNews) Between January and September 2024 this year, Chinese solar PV manufacturers together shipped 186.77 GW of solar modules, representing a year-on-year (YoY) increase of 18% compared to 157.65 GW exported during 9M 2023, according to InfoLink Consulting.

Are China's solar module exports increasing or decreasing?

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations by Solarbe indicate that while the export value is decreasing, the volume continues to rise.

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

China's combined crystalline silicon solar module production output within the 10 months of this year rounded up to 453 GW. It exported about 205.9 GW volume. The country's ...

Chinese solar module exports saw a decrease in November 2024, with shipments

totaling 15.2 GW, a 12% drop from October's 17.34 GW and a 14% decline compared to the ...

In September 2024, China exported approximately 3.86GW of photovoltaic modules to the Asia-Pacific market, reflecting a 17% decrease from 4.63GW in August and a 45% ...

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis.

To the Middle East, Chinese solar module exports totaled 2.43 GW, a 2% MoM and a 31% YoY decline in the month of September. For Q3, it amounted to 7.43 GW and ...

To the Middle East, Chinese solar module exports totaled 2.43 GW, a 2% MoM and a 31% YoY decline in the month of September. ...

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

China's combined crystalline silicon solar module production output within the 10 months of this year rounded up to 453 GW. It ...

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. Global module shipments increased 13% ...
