Solar module shipment price

Overview

Solar module prices in 2025 have stabilized after years of dramatic fluctuations, with global wholesale prices ranging from \$0.08 to \$0.28 per watt depending on technology, origin, and regional market conditions. How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

What is the market size of PV modules in 2024?

VDMA calculates PV module shipments in 2024 at 703 GW, with average prices having dropped by 33% compared to the end of 2023. The report also reveals that crystalline silicon PV technologies continue to dominate the global market with a share of around 98%, with n-type wafers accounting for a 70% share.

How big will solar modules be in the future?

Nonetheless, InfoLink forecasts a massive increase in total solar module shipments of the 13 companies in its top 10 list, reaching 700 GW, including 70% coming from new technology products. Top 4 producers target to ship over 90 GW to 120 GW, again increasing the gap from 2nd ranked manufacturers.

Did PV module prices drop 33% compared to 2023?

The new edition of the International Technology Roadmap for Photovoltaic (ITRPV), published this week, reports that average PV module prices last year dropped by 33% compared to the end of 2023. This week sees the publication of the annual ITRPV report, compiled by German engineering association VDMA.

Solar module prices around the world have moved in lockstep with Chinese prices for much of the past decade, which is no surprise given China's dominance in solar ...

Finlay Colville, head of market research at PV Tech, reveals the top ten PV module suppliers last year which was made by Chinese ...

Solar (photovoltaic) panel prices What you should know about this indicator IRENA

presents solar photovoltaic module prices for a number of different technologies. Here ...

The prices across all panel types have stabilized - only the prices for high-efficiency and bifacial products have seen a slight uptick, ...

In 2023, Jinko Solar was the leading solar PV manufacturer in terms of module shipment worldwide.

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

Nonetheless, InfoLink forecasts a massive increase in total solar module shipments of the 13 companies in its top 10 list, reaching 700 GW, including 70% coming from ...

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

Solar (photovoltaic) panel prices What you should know about this indicator IRENA presents solar photovoltaic module prices for a ...

Solar module prices around the world have moved in lockstep with Chinese prices for much of the past decade, which is no surprise ...

Nonetheless, InfoLink forecasts a massive increase in total solar module shipments of the 13 companies in its top 10 list, reaching ...

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

A Chinese solar module manufacturer among the world's 10 largest by shipments told Yicai that it recently raised the prices of products sold to Chinese distributors by about 2 ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

Enterprises with shipments below 6 GW may need to increase brand promotion efforts in 2025 and showcase their advantages from ...

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with ...

Global average price for solar PV modules 2016-2024 Average spot price for solar photovoltaic modules worldwide from 2016 to 2024 (in U.S. dollars per watt-peak)

TrendForce has ranked the top six module manufacturers by shipment volume in 2022, with Longi topping the list, followed by Trina ...

The new edition of the International Technology Roadmap for Photovoltaic (ITRPV), published this week, reports that average PV module prices last year dropped by ...

Susceptible to market demand, production plans, and socioeconomic factors, prices across the PV supply chain have fluctuated since late 2023, a pivotal period of p-type to n-type ...

In the dynamic world of solar energy, 2023 proved to be a noteworthy year for the top solar module manufacturers. The recently unveiled shipment rankings shed light on the ...

The new edition of the International Technology Roadmap for Photovoltaic (ITRPV), published this week, reports that average PV ...

Price Trend: Leading manufacturers are still attempting to uphold prices, but are increasingly challenged by lower-priced shipments ...

Overview This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of ...

The assessments would reflect an Indian time stamp (1630 IST) and follow the Platts India publishing schedule. The domestic price assessments would complement the existing ...
