

NKOSITHANDILEB SOLAR

Solar new energy component exports

215kWh

8,000+ Cycles Lifetime

IP54 Protection Degree

Overview

Why does China Export solar panels & modules?

China maintained its dominant grip on the export of solar panels and modules: The total solar module exports from China in 2023 amounted to around 220 Gigawatts (GW) of generation capacity, up 33.5 per cent from 2022 (when about 164 GW capacity was exported), possibly driven by global markets' efforts to expand clean energy generation.

Which countries export solar products?

As such, there has been a major rise in solar exports, with commodities like solar batteries, PV modules, panels, and silicon Wafers being shipped globally. One of the major global leaders in the manufacturing and exportation of solar commodities is China.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

How many solar modules are exported from China in 2023?

The solar module exports from China in 2023 amounted to around 220 Gigawatts of generation capacity, up 33.5 per cent from 2022's 164 GW.
