# **Solar panels in Osaka Japan**

## Overview

---

How big is Japan's solar industry?

The Japanese solar industry, with a current capacity of 75 GW, is set to reach 108 GW by 2030, driven by a 9.2% CAGR and expected to exceed USD 10 billion in revenue by 2025. Government policies, including Feed-in Tariffs, and growing investments in residential, commercial, and utility-scale projects.

Does Japan have a solar power industry?

Japan's solar power industry presents several key considerations for potential investors and stakeholders. The country has set ambitious renewable energy targets, aiming to increase its solar energy capacity significantly as part of its commitment to reduce greenhouse gas emissions.

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt (kW). Are there subsidies for installing solar panels in Japan?

How many kW is a solar panel in Japan?

5kW is the national average for installing solar panels in a home in Japan. The amount varies depending on the region and the property's roof size. The maximum for a household is 10kW. Do I need a storage battery with solar panels?

While not necessary, storage batteries are highly recommended.
