**Solar powered devices factory
in Argentina**

Overview

Is Epse launching a vertically integrated solar cell plant in Argentina?

State-owned EPSE is moving ahead with its plan to establish a vertically integrated solar cell and module manufacturing facility in Argentina's Pocito department, San Juan province. The arrival of an industrial laminator marks a major milestone for the long-delayed project.

Where is the largest photovoltaic plant in South America?

All thanks to the inauguration of the largest photovoltaic plant in South America. Located in the Puna of Jujuy, the Cauchari plant has been equipped with more than 900 thousand solar panels that will occupy 600 hectares in the town of Susques, about 4200 meters above sea level.

Where is the solar plant located in Jujuy?

Located in the Puna of Jujuy, the Cauchari plant has been equipped with more than 900 thousand solar panels that will occupy 600 hectares in the town of Susques, about 4200 meters above sea level. This project will not only provide clean energy, it will also generate local employment, contributing to the economic development of the region.

What is a Cauchari photovoltaic plant?

The Cauchari photovoltaic plant represents an achievement for Argentina and all of South America. This project will not only generate a significant amount of renewable energy, but will also create jobs and provide substantial income to the province of Jujuy.
