Solar powered water pumps in Johannesburg South Africa

Overview

Why should you use a solar pump in South Africa?

It is also ideally suited for the eco-friendly homes or homes in drought stricken areas which use boreholes for their water supply. The solar pump is one of the greatest solutions to the electricity problems in South Africa as it utilises the abundance of free energy which we receive each day from the sun.

Should you invest in solar water pumps in South Africa?

Investing in solar water pumps is a smart, cost-effective decision for managing your water needs in South Africa. Whether you need to draw from a borehole, boost pressure, or use water stored in tanks, we can recommend an efficient water pump.

What is a solar water pump?

Provide drinking water for communities or livestock including cattle, sheep and more. Residential or Commercial Swimming Pools. LORENTZ solar water pumps helps agricultural businesses and communities across South Africa take control of their water and save time and money with German engineered solar water pumping technology.

What is a surface solar pump?

Surface solar pump – these sit above ground and move water through pipes. They are handy for moving large quantities of water at a slow pace and are commonly found on farms or large irrigation systems where water needs to be moved from a lake or other body to fields or landscaping.
