Sophia Energy Storage Power Station Factory Direct Sales

Overview

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

Why is Tesla planning a 40 gigawatt-hour power plant in Shanghai?

The planned annual capacity of 40 gigawatt-hours underscores Tesla's ambition to capture a significant share of the energy market while potentially creating numerous jobs in Shanghai and its vicinity. This move also intensifies competition within China's energy storage sector, potentially spurring further technological innovation.

How many megapacks will Shanghai megafactory supply?

The newly opened Shanghai Megafactory is expected to supply Megapacks for the new energy storage station. The factory has a targeted annual capacity of 10,000 Megapack units, equal to 40 GWh of storage. Are you buying a Tesla?

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.
