St Johns Home Solar Street Lights

Overview

What is a solar street light?

A solar street light is a raised lighting system powered by a photovoltaic (PV) module charging a battery that runs an LED luminaire at night. Modern systems are off-grid, smart-controlled, and designed to operate through low-sun periods. Pole/brackets & wiring, optional sensors/remote monitoring.

Is solar street lighting eco-friendly?

Request A Quote for Your Lighting Projects! In recent years, a quiet revolution has illuminated the path toward sustainable development; solar street lighting has emerged as a beacon of eco-friendly innovation. This technology harnesses the sun's bounty, transforming it into a reliable light source after dusk.

Do solar street lights save energy?

In fact, you can keep the lighting dim to save energy and let the built-in motion sensors brighten up the space as soon as any activity is detected. Like all outdoor solar street lights, the Alpha 1080X also offers solid backup with a full day of charge and illuminates your space throughout the dark hours.

How do solar street lights work?

Further, this solar street light works with a combination of auto mode and motion sensors. Herein, while the auto-mode turns the light on at dusk, motion sensors control illumination to save energy. Pro: If you have some hands-on experience working with street lights, you can easily install these lights by yourself.
