# St Lucia Bureau Uninterruptible Power Supply Work

**ESS**

**61.44kWh**

**40.96kWh**

## Overview

---

What is the future of electricity in Saint Lucia?

At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and advanced controls and metering present a myriad of opportunities. Saint Lucia's current electricity system is well managed, reliable, and equitable.

Is Saint Lucia's Electricity System reliable?

Saint Lucia's current electricity system is well managed, reliable, and equitable. This can be primarily attributed to the fact that LUCELEC is a responsible and financially sound utility.

What is Saint Lucia's energy transition opportunity?

RESULTS Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

How much electricity is generated by the cul-de-sac power station?

LUCELEC operates a modern computerized generating facility, namely the Cul-de-Sac Power Station, which houses 10 generators with an available capacity of 86.2 MW. Over 360 million electricity units are generated each year from the available generation of 88.4MW, including the 3MW solar farm in La Tourney, Vieux-Fort.
