# **Tariffs on export of solar modules**

## Overview

---

What tariffs are imposed on Chinese solar cells & modules?

The U.S. had imposed several trade barriers against Chinese solar cell and module imports. In addition to the original 25% tariff under the Section 301, there are anti-dumping and countervailing duties (AD/CVD) that have been imposed since 2012 as well as the Section 201 tariffs targeting cells and modules from all countries.

How will the 301 tariff affect the US solar supply chain?

Notably, the adjusted 301 tariff expands to cover Chinese exports of polysilicon and mono-Si wafers, with a 50% tariff rate set to take effect on Janu. This move is expected to affect the upstream sector in the US PV supply chain. The U.S. had imposed several trade barriers against Chinese solar cell and module imports.

How will tariffs affect solar cells in 2024?

In 2024, tariffs for electric vehicle battery cells will increase to 25%, with energy storage tariffs following suit in 2026. The direct import of solar cells from China was less than 1% in 2021, underscoring the limited direct impact on solar cells these tariffs may have in the U.S. market.

Are US tariffs on solar panels the highest?

Coalition trade lawyer says the U.S. Department of Commerce's final tariffs on solar cells and modules from Cambodia, Malaysia, Thailand and Vietnam are among the highest rates he's ever seen. From pv magazine USA

## Tariffs on export of solar modules
