# **The difference between the curtain wall industry and the solar industry**

## Overview

---

Why is the curtain wall market growing?

The growth is driven by key factors such as rapid urbanization, architectural trends, energy efficiency, and sustainability. The global curtain wall market reached USD 38 billion in 2019 and recorded high growth during the past few years.

How big is the curtain wall market?

The curtain wall market size exceeded USD 44.2 billion in 2024 and is expected to grow at a CAGR of 7.2% from 2025 to 2034, driven rapid urbanization, architectural trends, energy efficiency, and sustainability.

What is the global curtain wall market?

The global curtain wall market reached USD 38 billion in 2019 and recorded high growth during the past few years. The major cause of growth was the rising construction of commercial, institutional, and high-rise dwelling buildings.

Do curtain walls save energy?

Curtain walls conserve building energy in the form of better thermal performance, daylight, and tighter envelopes. They are being used more frequently in buildings, rated according to green standards such as LEED, BREEAM, and IGBC, fueling market growth.

## The difference between the curtain wall industry and the solar industry

---

The global curtain wall market reached USD 38 billion in 2019 and recorded high growth during the past few years. The major cause of growth was the rising construction of commercial, institutional, and high-rise dwelling buildings.

Curtain walls conserve building energy in the form of better thermal performance, daylight, and tighter envelopes. They are being used more frequently in buildings, rated according to green standards such as LEED, BREEAM, and IGBC, fueling market growth.

These uncertainties create a gap between PV technology and construction industry, slowing down the process of full integration of PV into the curtain wall system and making PV technology less ...

In 2025, the curtain wall industry is at a critical node of transformation and upgrading. How to strike a balance between cost ...

The curtain wall systems are predominantly designed to enclose buildings while providing a facade--this function complicates the ...

Renovation and Retrofitting: The need to upgrade existing buildings with energy-efficient solutions provides a potential market for ...

Renovation and Retrofitting: The need to upgrade existing buildings with energy-efficient solutions provides a potential market for curtain wall systems. Integration of ...

Curtain walls have been an important element in modern architecture for decades, transforming skylines and redefining the relationship between buildings and their surroundings. ...

The prospects for solar curtain walls within the construction industry appear highly promising. Developments in materials science and photovoltaic technology are anticipated to ...

Solar Photovoltaic Curtain Wall Market Size was estimated at 4.09 (USD Billion) in 2023. The Solar Photovoltaic Curtain Wall Market Industry is expected to grow from 4.77 (USD Billion) in ...

The solar photovoltaic (PV) curtain wall market is experiencing robust growth, driven by increasing demand for sustainable building solutions and government incentives ...

The solar photovoltaic (PV) curtain wall market is experiencing robust growth, driven by increasing demand for sustainable building solutions and the escalating need to ...

The prospects for solar curtain walls within the construction industry appear highly promising. Developments in materials science and ...

The curtain wall market size exceeded USD 44.2 billion in 2024 and is expected to grow at a CAGR of 7.2% from 2025 to 2034, driven rapid urbanization, architectural trends, energy ...

The curtain wall systems are predominantly designed to enclose buildings while providing a facade--this function complicates the integration of solar technologies. The ...

In 2025, the curtain wall industry is at a critical node of transformation and upgrading. How to strike a balance between cost pressure and technological iteration, and find ...
