# **The largest wind power station in Windhoek**

## Overview

---

The Diaz wind farm near Luderitz has a total capacity of 44 megawatts (MW) and is scheduled for commissioning in July 2025. Is Windhoek a leaning power station?

Some has an opinion that one of power station chimney is leaning, a leaning tower of Windhoek. It is decked with metal bars to counter the skewness caused by construction miscalculation. Windhoek Van Eck Power Station is worth your visit if you are in Windhoek before or after a self-drive tour around Namibia.

Does Namibia use wind energy for electricity generation?

The economic analysis evaluated the utilization of wind energy for electricity generation from the country's point of view, assuming that Namibia continues to rely on imports from the RSA as per purchase agreement of 1996.

What is the largest wind farm in the world?

Roscoe Wind Farm was once the largest wind farm in the world. Located in west-central Texas, it spans over 100,000 acres of farmland. The project includes nearly 630 turbines, grouped into four major development phases. The total capacity stands at 781 megawatts. That output can support the energy needs of around 250,000 average homes.

What is wind power?

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets. It contains data about wind farms, turbines, manufacturers, developers, operators, owners and also pictures and cartographical data
