What is an off grid 3 phase inverter?

The off grid 3 phase inverter means that the voltage that converts DC to AC is three phase power supply, that is, AC 380V. It consists of three AC potentials with the same frequency, equal amplitude, and 120° phase difference, can carry industrial 3 phase electrical appliances.

What is the production capacity of high-power 3 phase solar inverter?

The inverter production plant is 10,000 square meters, 8 production lines and about 200 employees. The monthly production capacity of high-power 3 phase hybrid solar inverter (10Kw~150Kw) is 8,000 units. It is worth mentioning that there are very few manufacturers producing high-power 3 phase solar inverters off grid in the market.
