

## **NKOSITHANDILEB SOLAR**

# **To install solar panels and batteries**

## Overview

---

Can you add a battery to a solar panel system?

You can add a battery to an existing solar panel system. You can get an AC-coupled system which can use lithium-ion batteries to store the energy. The All In One Purestorage II would be perfect for this. If you do not have solar panels, adding a solar battery is another great way to increase your savings.

How much does it cost to install solar panels and battery?

It is easier and cheaper to install the panels and battery at the same time. But if you've already installed solar panels and want to add storage, you can: The battery will cost anywhere from \$12,000 to \$22,000. Ask your solar installer if they can add a battery to your system.

Where should I install my solar battery?

We recommend you install your battery in a place away from direct sunlight or heavy rain. If possible, we will install in a garage or carport. The battery will be mounted to your wall above the ground. How will I know if my solar battery is working?

After installation, we monitor your battery 24/7 to make sure it's working.
