Tokyo Energy Storage Power Station Manufacturer Direct Sales Company

Overview

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Why is Sun village expanding its battery storage projects in Japan?

As the role of grid-scale energy storage systems gains importance in ensuring stable grid operations and promoting renewable energy adoption, Sun Village is expanding its battery storage development projects across Japan.

How many MWh will Sungrow's powertitan & PowerStack energy storage systems deliver?

Under this agreement, Sun Village plans to deploy approximately 500 MWh of Sungrow's PowerTitan and PowerStack series energy storage systems in battery storage power plants across Japan.

How will Itochu contribute to the stabilization of Japanese electric systems?

By using the energy from these energy storage batteries in the wholesale electricity market, the balancing market, and the capacity market, ITOCHU will contribute towards the stabilization of Japanese electric systems. Installation will begin in the first half of FY2023 and operations are expected to begin in FY2025.
