# Tokyo New Energy solar Power Generation Energy Storage Equipment

## WORKING PRINCIPLE

## Overview

---

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Where can solar systems be installed in Japan?

Solar systems are currently being installed on factories and logistics facilities under power purchase agreements (PPAs) for commercial customers and public institutions. The Japanese solar market is seeing an increase in C&I parks. Sungrow offers SG49.5CX-JP and SG100CX-JP string inverters, as well as ST159KWH-50HV energy storage systems.

What is renewable Japan?

As a company specializing in renewable energy, Renewable Japan is running various businesses, including the development, power generation, and operation and management (asset management, O&M) of power stations using renewable energy sources such as solar power, wind power, and hydro power.

Does Tokyo Gas have a battery energy storage system?

Tokyo Gas is also participating in the Japanese utility-scale battery energy storage system (BESS) market, signing a 20-year tolling offtake deal with Australian developer Eku Energy for a forthcoming 30MW/120MWh project.
