## Overview

---

Can Australia help secure Tonga's outer island energy needs?

Australia also has a long history of engagement in relation to helping secure Tonga's outer island energy needs. In the early 2000s, Australia funded the Ha'apai Outer Islands Electrification project (HOIEP), which involved the installation of diesel-powered generators and electrical reticulation on four islands in the Ha'apai group.

How many people have access to electricity in Tonga?

This means that little more than 30,000 people are spread across 35 islands, presenting acute issues in terms of the provision of modern infrastructure. At OIREP commencement, the ADB estimated that 89% of all households across Tonga had access to electricity.

Why is electricity so expensive in Tonga?

This has contributed to the Tongan economy and electricity consumers being exposed to high and volatile electricity prices due to fluctuations in the price of oil internationally. According to UK-based aggregate website Cable, Tonga's electricity is the 13th most expensive in the world, at an average cost of USD 0.35 per kilowatt hour (kWh).

How can oirep help Tonga's remote island communities?

However, significant needs and opportunities exist to further expand renewable energy systems on outer islands. Less tangible, but also important is the role played by OIREP in consolidating Tonga's social contract with remote island dwelling communities, by allowing for enhanced and more reliable access to electricity.

In the early 2000s, Australia funded the Ha'apai Outer Islands Electrification project (HOIEP), which involved the installation of diesel-powered generators and electrical reticulation on four islands in the Ha'apai group.

This means that little more than 30,000 people are spread across 35 islands, presenting acute issues in terms of the provision of modern infrastructure. At OIREP commencement, the ADB estimated that 89% of all households across Tonga had access to electricity.

This has contributed to the Tongan economy and electricity consumers being exposed to high and volatile electricity prices due to fluctuations in the price of oil internationally. According to UK-based aggregate website Cable, Tonga's electricity is the 13th most expensive in the world, at an average cost of USD 0.35 per kilowatt hour (kWh).

However, significant needs and opportunities exist to further expand renewable energy systems on outer islands. Less tangible, but also important is the role played by OIREP in consolidating Tonga's social contract with remote island dwelling communities, by allowing for enhanced and more reliable access to electricity.

This TAP on installing on-grid solar system-based in Tonga is scheduled from 2025 to 2027, beginning with recruiting consultants/local experts and establishing to the institutional ...

Tonga's solar revolution is lighting up more than just homes: it's unlocking economic potential, reducing national fuel bills, and ...

Bloemfontein's semi-arid landscape soaking up 3,200+ annual sunshine hours\*, while Tonga's tropical islands battle rising sea levels and diesel dependency. Both need solar ...

Led by the Asian Development Bank (ADB) and co-financed by Australia, the European Union, the Second Danish Cooperation Fund for Renewable Energy and Efficiency ...

The Tonga Integrated Energy Storage Power Station demonstrates that energy independence isn't a distant dream--it's achievable today. By combining solar, wind, and smart storage, ...

The system, part of the Tonga Renewable Energy Project (TREP), delivers 73.08kWp of solar energy, supported by a 1,313.28kWh battery storage system and a modern ...

6 March 2023 ""Ohonua, ""Eua Tonga (02nd March 2023) -- Tonga Power Limited (TPL) has commissioned a new solar and battery energy storage system in Eua, Tonga, with the ...

Tonga's solar revolution is lighting up more than just homes: it's unlocking economic potential, reducing national fuel bills, and providing communities with a cleaner, ...

Discover the Tonga renewable energy project based on storage technology, located in Nuku'alofa, Tonga, in the South Pacific Ocean.

How will Tonga move away from fossil fuels? This project aims to help Tonga move away from fossil fuels and shift to renewables. The project will deliver utility-scale storage systems to ...

Tonga Energy Background Current energy grids: Tongatapu, Vava'u, Ha'apai, Eua, and Niua Toputapu (recently turned to solar): powered by diesel generators Solo provider: ...
