UK rooftop solar panel installation

Overview

See typical 2025 prices for home solar in the UK, understand what affects installation costs, and get tailored quotes from trusted MCS installers. How much do solar panels cost in the UK in 2025?

Do building regulations support demand for rooftop solar in England?

Building regulations in England support growth in demand for rooftop solar as new-build properties make up significant share of small-scale PV installations. Strong installations in first quarter of 2025 were followed by a new single-day record for UK solar generation in April.

Are UK rooftop solar installations growing?

New buildings regulations in England have supported growth for rooftop installations, however retrofit remains the largest small-scale PV segment. Photo: MCS There were 57,000 certified rooftop solar installations in the United Kingdom in the first three months of 2025, the strongest first quarter for more than a decade.

Will new homes benefit from rooftop solar?

New homeowners stand to benefit from rooftop solar and cheaper bills, with the Future Homes Standard being published this Autumn. Working people stand to save hundreds of pounds off their energy bills as the government confirms new build homes will have solar panels by default, unleashing a rooftop revolution.

Should you put solar panels on your roof?

Installing solar panels is a great way to lower your energy bills and lower your carbon footprint. You can also sell extra energy you make, making them even more worthwhile. But if you want to put solar panels on your roof, where do you start?

Our step-by-step guide will take you through the solar panel installation

process from start to finish.
