# **Uninterruptible power supply for Amsterdam factory**

## Overview

---

Why do you need an uninterruptible power supply system?

Uninterruptible power supply systems can reduce downtime (and its cost) in manufacturing by providing reliable backup power in an emergency. A UPS allows your systems to shut down slowly, in alignment with standard procedures, as opposed to the rapid shutoff of an outage, which could damage the equipment.

What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) greatly benefits homes, offices and businesses. It ensures a continuous power supply, even during power outages or fluctuations. This is crucial for sensitive electronic devices such as computers, Wi-Fi routers, and point-of-sale (POS) equipment.

What is a 3-phase uninterruptible power supply (UPS)?

A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.
