

Uninterruptible power supply for Yemen factory

Overview

What is UPS (uninterruptible power system)?

UPS (Uninterruptible Power System), that is, uninterruptible power supply, is a constant voltage and constant frequency uninterruptible power supply with energy storage devices and inverters as the main component.

What is a Mitsubishi Electric uninterruptible power supply (UPS) system?

Mitsubishi Electric uninterruptible power supply (UPS) systems provide daily power conditioning as well as backup power in the event of an outage to reduce damage to manufacturing equipment and maintain uptime for your production line.

Why do you need an uninterruptible power supply system?

Uninterruptible power supply systems can reduce downtime (and its cost) in manufacturing by providing reliable backup power in an emergency. A UPS allows your systems to shut down slowly, in alignment with standard procedures, as opposed to the rapid shutoff of an outage, which could damage the equipment.

What is MTU uninterruptible power supply?

Whether for food processing, chemical, textile or other critical manufacturing processes, mtu distributed energy solutions including uninterruptible power supply are aimed at maximizing uptime.
