# **Victoria Commercial Energy Storage Device Manufacturer**

## Overview

---

Why did energy dome choose Victoria?

Energy Dome chose Victoria for its collaborative energy industry, ambitious net-zero targets, strong commitment to renewable energy and attractive investment initiatives. As the state transitions from coal-fired power and faces growing industrial energy demands, it presents an ideal environment for long-duration energy storage solutions.

When will the rangebank battery energy storage system be fully operational?

The industrial-scale Rangebank battery energy storage system, located 50 kilometres southeast of Melbourne, Victoria, has successfully been energised and is scheduled to be fully operational by late 2024.

How many Bess sites are there in Victoria?

The 70MWh of BESS will be spread across seven identical sites in Victoria. Image: Ingeteam. Spain-based energy conversion equipment specialist Ingeteam has been tapped to deliver inverter solutions for seven battery energy storage system (BESS) projects in Victoria, Australia, totalling 35MW/70MWh of capacity.

Who owns Shell Energy Australia's Bess battery?

Through an offtake agreement, Shell Energy Australia will have access to 100% of the battery's offtake over a 20-year period. The BESS was built and will be serviced and maintained by America-headquartered storage specialists Fluence, which also supplied its sixth generation Gridstack energy storage technology across the 19,250 square metre site.
