Victoria Solar Prices

Overview

As of October 2024, homeowners in Victoria can expect to pay around \$4,150 for a 4kW system, \$4,630 for a 5kW system, \$5,200 for a 6kW system, \$6,070 for a 7kW system, and \$7,850 for a 10kW system. How much do solar panels cost in Victoria?

One of the primary concerns when considering solar panels is the upfront cost of installation. In Victoria, the cost of installing solar panels can vary depending on several factors, including the size of your solar system and the quality of the panels. On average, a 6.6kW solar panel installation can cost between \$4,000 to \$10,000.

How much money can you save with solar panels in Victoria?

The amount of money you can save with solar panels in Victoria is determined by various factors, including the size of your system, your energy consumption, and the feed-in tariff rate. On average, a 6.6kW solar system can generate around 20-25 kWh per day, which translates to approximately 7,300-9,125 kWh per year.

How much are solar rebates in Victoria?

The Victorian government offers solar rebates and interest free loans to help reduce the upfront cost of solar panel and battery installations. For solar panels, rebates of up to \$1,400 are available along with interest-free loans to the same value for eligible households.

Is Victoria a good place to install solar panels?

[Home](#) » [Solar Panels Australia](#) » [VIC Solar Panel Installation & Information](#)
Victoria is rapidly emerging as a leader in solar energy, with over 700,000 homes expected to have solar panels by 2024. As more residents turn to solar energy in Victoria, households benefit from reduced electricity bills and a lower carbon footprint.
