Vienna Mobile Energy Storage Container with Ultra-Large Capacity

Overview

CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass production at EES Europe 2025, representing a strategic leap forward in capacity, deployment flexibility, safety, and transportability. What is CATL TENER energy storage?

To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution. It breaks the limitations of power capacity and product transportation, and makes breakthroughs in space utilization, energy efficiency, and cost.

Is CATL TENER energy storage a BESS system?

"CATL has always been at the forefront of the energy transition," said Amanda Xu, CTO ESS & President of ESS Europe CATL. "To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.

What makes TENER Stack a good energy storage system?

Quiet operation (65dB), making it suitable for cities. With over 1,700 global deployments, CATL continues to push energy storage boundaries. TENER Stack builds on its TENER (zero-degradation) and TENER FLEX (modular rack) systems, offering unprecedented energy density and cost savings.

Will AI reshape energy storage?

Unveiled ahead of EES Europe 2025, this cutting-edge technology promises to reshape how industries and utilities manage energy storage amid surging global demand driven by AI, data centers, and industrial electrification.
