What is a solar water pump inverter?

SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs. Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources.

What is veichi solar water pump inverter?

- Constant pressure water supply solution. VEICHI solar water pump inverter is a high-efficiency solar water pump controller which can make full use of solar energy to drive water pumps for agricultural irrigation, water supply system, fountains, groundwater lowering and etc.
- Ingenious design -- small and exquisite inverter modules;

Which solar water pump inverter is best?

With modular design and IP65 protection, VEICHI SI30 solar water pump inverter is highly praised by customers. SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs.

What is solar water pumping system?

Solartech solar water pumping system help to solve the problem of land desertification. The project was installed and completed in Naypyidaw, Myanmar in 2015, using Solartech PB first generation 3700W inverters. This device not only meets the drinking water needs of 800 people, but the remaining water is also used to irrigate 100 acres of rice.
