Wellington Power Station Generator BESS Information

Overview

What is the Wellington Battery energy storage system (BESS)?

The Wellington Battery Energy Storage System (BESS) is planned to be developed in the central west New South Wales (NSW), Australia. The project will comprise a grid-scale BESS with a total discharge capacity of around 400MW. AMPYR Australia, a renewable energy assets developer in the country, owns 100% of the BESS project.

What is the Wellington Bess project?

“The Wellington BESS will contribute towards supporting Australia’s journey towards a more sustainable and reliable energy future,” said RJE Global in a statement. The project sits within the Dubbo Regional Council LGA and is part of broader efforts to boost storage infrastructure as renewable penetration increases across the NEM.

Which energy storage products will Fluence provide for the Wellington Bess stage 1?

Fluence will provide its full suite of energy storage products, including Gridstack and Mosaic, for the Wellington BESS Stage 1. Image: Fluence. Renewable energy developer Ampyr Australia has reached financial close on its 300MW/600MWh Wellington battery energy storage system (BESS) Stage 1 in New South Wales.

When will the Wellington Bess be energised?

Stage 1 of the Wellington BESS is scheduled to be energised in 2026. Ampyr Australia has contracted Fluence, a battery storage system integrator and clean energy software and services company, to deliver the 600MWh Wellington BESS.
