What Is an Uninterruptible Power Supply (UPS)?

.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

Do ups need a battery?

UPS are equipped with batteries inside to supply power to connected devices in the event of a power outage. There are two types of batteries for UPS: MSE and UPS-only. The charge capacity of a battery decreases as it is used. It is recommended that they be replaced when their charge capacity drops below 80%.
