What battery cabinet manufacturers are there in Serbia

Overview

Could Serbia be a technological leader in LFP battery production?

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance to become the first in Europe to mass-produce this type of battery. The signed Memorandum with the European Union envisages a serious focus on the ecosystem of electric vehicles and battery production.

Can Serbia become the energy power of the world?

Serbia has a chance to become the energy power of the world in a few years. If we were to form an entire production chain in Serbia, it would certainly open up space for numerous investments in our country. The economic and market potential of this type of business model and supply chain in Serbia is enormous.

What is the economic potential of a supply chain in Serbia?

The economic and market potential of this type of business model and supply chain in Serbia is enormous. We could expect about 10-12 billion euros of new income for Serbia and about 20 thousand new jobs in our country, as well as a consequent serious growth and development of employees in the industry.
