# **What brand of outdoor base station AP is good**

## Overview

---

What is the best outdoor access point?

Our statistics say that it is the most favorite Outdoor Access Point from the list above. If you're still undecided, I would recommend that you go with the masses and choose the top selling outdoor access point: The TP-Link Omada Long Range Point is the hottest bestseller in this category right now.

Which Ubiquiti access point is best for outdoor use?

The Unifi Mesh access point is at the moment the most popular access point from Ubiquiti to use outdoors. It comes with two adjustable Omni antennas that can be angled 45 degrees to cover the area beneath the access point better. The antennas are removable, allowing you to replace them with spot-beam antennae for example.

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps \* Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

Should I buy an outdoor access point?

With an outdoor access point, you can easily extend your wireless network outside. I really recommend not to buy access points that only cost \$20 or \$30. The specifications of those devices may look good, but most of the time they can deliver the performance they say.
