What energy storage charging stations are being invested in Croatia

Overview

How many high-power charging stations will be installed in Croatia?

GreenWay, a CPO headquartered in Poland, plans to install 300 high-power charging stations in Croatia over the next three to five years. As GreenWay CEO Dino Novosel told local media, the stations will have a capacity of 100 to 400 kW. They will be installed along strategic corridors, urban areas, and commercial facilities.

Who owns a power station in Croatia?

All power stations in Croatia are owned and operated by Hrvatska elektroprivreda (HEP), the national power company. As of 2015, HEP operates 26 hydroelectric, 4 thermal and 3 cogenerating power plants with the total installed electrical power of 3.654 MW.

How to find EV charging stations in Croatia?

Languages: Croatian, English Espots is a free mobile application for Android phones that shows all the electric charging stations supported by Hrvatski Telecom. You may use this app to locate and book EV stations as well as pay for the charging session. It also offers a navigation system leading you to the desired charging station.

When will a new Charger be built in Croatia?

Construction in Croatia will begin in January 2024, with the first site in the city of Slunj. Croatia currently has at most 34 chargers per 100,000 inhabitants, according to the media report, 20 times weaker than the most developed market in the European Union, the Netherlands, and three times under the EU average.
