**Which country has more 5G  
base stations in Maldives**

## Overview

---

Which countries are implementing 5G?

The Americas and Europe are on the forefront of 5G implementation, as our map shows. But investments in the technology have also been made in almost every country in Asia, with the technology also already deployed in many Asian countries.

Which country has the first 5G network?

South Korea is the country which deployed the first 5G network and is expected to stay in the lead as far as penetration of the technology goes. By 2025, almost 60 percent of mobile subscriptions in South Korea are expected to be for 5G networks.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

When will 5G be launched in India?

A launch in India is expected for next year and an auction for 5G bandwidth frequencies kicked off this week. This chart shows the countries where 5G networks were launched, where 5G technology has been deployed in mobile networks and where investments in 5G technology have been made (as of June 2022).
