# **Which is the largest energy storage power station in Poland**

## Overview

---

What is the current percentage of Poland's gas storage facilities?

Poland's gas storage facilities are 81% full, gas company PGNiG said on Wednesday, an increase on the previous week after Russia cut off supplies.

How big is Poland's energy transformation?

The innovative large-scale project to supply 263 MW and minimum output 900 MWh is a milestone in Poland's energy transformation. The storage will be four times bigger than the present biggest in Europe of 196 MWh recently launched in the UK and capable of supplying power to 300 thousand households for 2 hours.

Could Poland be Central Europe's battery technology hub?

As Tauron Group's recent €150 million storage tender shows, Poland isn't just catching up - it's positioning itself as Central Europe's battery technology hub. The race is on to develop storage solutions that work as hard as Polish coal miners once did, but with cleaner hands and smarter software.

How much energy is produced in Poland?

At present 25% of total energy in Poland is produced from RES, including 15% by wind farms. Returning to growth as normal?

Bank Millennium believes the Polish economy will gradually recover this year, driven by stronger consumer sentiment.
