

# Which portable power bank should I bring to Peru

## Overview

---

Do I need a power adapter when traveling to Peru?

If you are traveling to Peru with electronic devices from a country with a different voltage or frequency, you will need to use a power adapter and possibly a voltage converter to ensure safe and proper operation of your devices. It is always a good idea to check the voltage and frequency requirements of your electronics before traveling to Peru.

Why should you buy a power adapter in Peru?

This makes it ideal for powering your phone, laptop, tablet, camera, and more, ensuring all your essential electronics are ready for use in Peru and beyond. The adapter incorporates a built-in fuse, safety shutters, and a plug lock system, prioritizing safety for your devices.

What voltage is used in Peru?

In Peru, power plugs and sockets (outlets) of type A and type C are used. The standard voltage is 220 V at a frequency of 60 Hz. Peru is a land of incredible diversity, from the ancient ruins of Machu Picchu to the Amazon rainforest, and the bustling capital city of Lima.

Do I need a voltage converter in Peru?

The frequency in Peru is 60 Hz, which is also different from some countries. Therefore, it is likely that you will need a voltage converter to use your electronic devices in Peru. If your electronic device is designed for 220 volts and 60 Hz, then you will not need a voltage converter.
