

**NKOSITHANDILEB SOLAR**

# **Winch circuit breaker factory in Netherlands**

## Overview

---

Where is Euro winch located?

Ideally located in the Port of Rotterdam, Euro Winch will provide high quality marine equipment and associated services across the Netherlands, Europe and the rest of the world. Winches need to meet high standards in order to stay operational in the worlds harshest environments.

What brands of winches can Luyt service?

You can also contact us for service and repairs on other brands of winches, including Ridderinkhof, Brusselle, Bodewes, etc. LUYT has designed and delivered several wire-guidance systems over the years.

What is a Luyt winch?

While the first winches with a maximum pulling power of ten tonnes were mainly built for fishing boats, there is now an equal focus on the offshore industry. These winches have a tensile force of one hundred tonnes and are used on large pontoons. Noteworthy: they are very quiet. LUYT winches are strong, silent, reliable and durable.

Do you service or repair your winches?

Winches are provided with remote-controlled pneumatic steering systems and are driven hydraulically, electrically or with diesel. Our service engineers travel all over the world to service and repair our winches. You can also contact us for service and repairs on other brands of winches, including Ridderinkhof, Brusselle, Bodewes, etc.
