Yamoussoukro Communications jointly builds 5g base stations

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Does China have a 5G base station?

Earlier this year, industry calculations indicated that China's 5G base stations -- the relay point between mobile phones and the larger internet -- accounted for more than 60 percent of the global total, highlighting the country's leading position in 5G deployment worldwide.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

Why are 5G subscriptions growing so fast in China?

The rapid growth in 5G subscriptions has been supported by massive infrastructure development. MIIT figures show China had deployed about 4.2 million 5G base stations by the end of last month.
